## **Environmental Management System Policy Statement**

---

**TO ALL COMPANY EMPLOYEES, CONTRACTORS AND CUSTOMERS;**

We shall remain committed to our Environmental Management System and conduct our operations in an environmentally sound manner by:

- Assessing the environmental aspects of our operations.
- Ensuring that environmental, energy and resource management considerations are an integral part of the management process for all business activities.
- Committing to resource and energy conservation, waste minimization and pollution prevention programs to reduce the risk to natural resources and the marine environment.
- Complying with applicable environmental laws, regulations, and other requirements.
- Enhancing employee awareness of environmental programs and policies and providing them with appropriate environmental management training.
- Responding to employee, customer, vendor, contractor and community concerns regarding the environmental aspects of our operations and educating all parties on our environmental management program.
- Setting annually, quantifiable environmental objectives and targets that result in continuous improvement of our environmental management program.
- Requiring a commitment to environmentally responsible operations from our employees, customers, vendors, sub-contractors and third party personnel with whom we conduct our operations.
- Assessing and reporting on the Company's environmental management program performance and its conformity with this policy.

Todd Hornbeck  
CEO and President
