

**HORNBECK OFFSHORE SERVICES, INC.**

*Service with Energy*

## Quality, Safety, Security, and Environmental Protection Policy Statement

### TO ALL COMPANY EMPLOYEES, CONTRACTORS AND CUSTOMERS;

The health, safety and security of people and protection of the environment are the most important considerations in any operation conducted by Hornbeck Offshore. No job is so crucial that our Company will not take the time to complete it safely and pollution free. It is imperative that each employee and contractor of the Company understands the personal responsibility each has for his or her own health, safety, security and protection of the environment.

Personal responsibility for preventing accidents begins with understanding and observing the Company's established policies, procedures and safe work practices. Each employee is required to periodically review the Safe Operations Manual and other materials which are available on board Company vessels and at all shoreside management locations. Furthermore, everyone is encouraged to participate in the development of new procedures or improvements to existing procedures, through our Management of Change process (Safe Operations Manual, Section 2.130). In order for the Company to have a culture of safety we must always look critically at our attitudes, values and behaviors. Safety is more than something we "do"; it is and must remain as something we "are", whether we are at work or home. Our very lives, the lives of our co-workers, and our families' livelihood depend on it. In furtherance of our commitment to "Goal Zero", working injury, incident, and pollution free, the Company has adopted the following policies:

### PROTECTION OF PEOPLE AND THE ENVIRONMENT

Hornbeck Offshore and its subsidiary companies shall conduct all of its operations with due regard to the health, safety and security of its employees, contractors, and the public; the prevention of human injury or loss of life; the avoidance of property damage; and the preservation of the environment. The Company shall endeavor to provide a safe and secure work environment, establish safeguards against all identified risks, train and prepare for emergencies, and strive to continuously improve the safety management skills of all personnel. The Company shall hire and retain professional, qualified employees and shall in the conduct of its operations utilize quality, health, safety and environmental management systems to become the energy industry's marine transportation and service-company of choice with regard to safety and the protection of the environment.

### QUALITY POLICY

It is the policy of Hornbeck Offshore to provide quality service in support of our mission statement. We will strive to provide excellent customer service at Company facilities and on board Company vessels with due regard for cost and efficiency. We will use our safety, quality and environmental management systems to recruit, hire, and train the most qualified professionals available and will strive to maintain our equipment in seaworthy condition at all times.

We will continually review our performance against targets and objectives set each year and take actions necessary to continuously improve our base and marine operations. This policy reflects our Company's commitment to meet the requirements of the ISO 9000 series of standards for quality management.

### STOP WORK AUTHORITY

All Company employees are directed to stop any task or operation where the risk to people, the environment or assets can't be managed in accordance with the Company's established policies, procedures and safe work practices. If you have any questions regarding this or any policy, please direct them to your local QHSE Department representative or the Company's Designated Person Ashore.
